PURPOSES OF POLICY SURVEILLANCE: PRODUCERS MEET USERS

Policy Surveillance as A Public Health Service

Scott Burris

The 5 Essential Public Health Law Services

Burris, S., Ashe, M., Blanke, D., Ibrahim, J., Levin, D. E., Matthews, G., . . . Katz, M. (2016). Better Health Faster: The 5 Essential Public Health Law Services. *Public Health Reports*, 131(6), 747-753

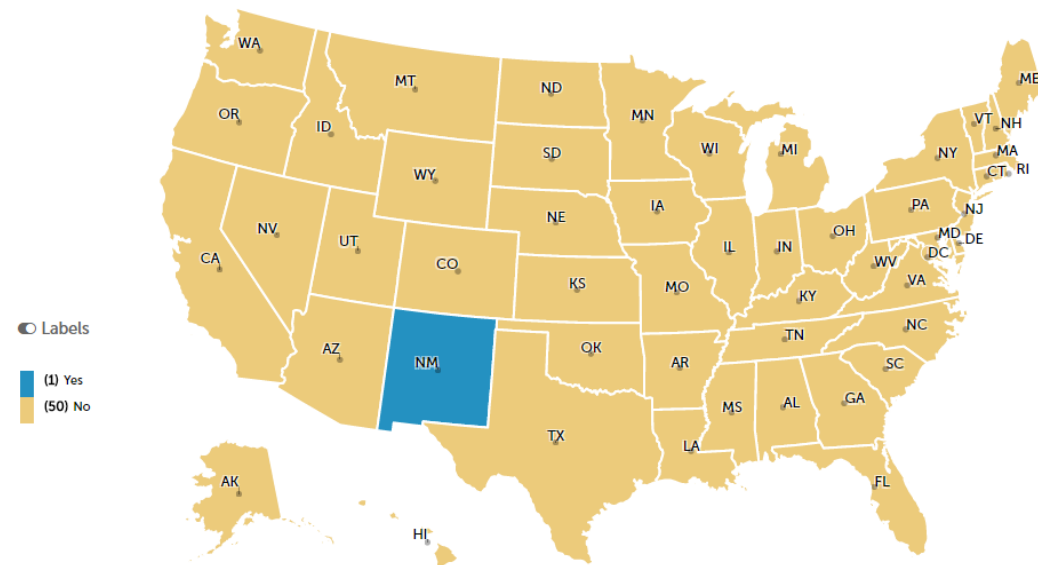

Date for Evaluation

Access to Innovative Ideas

1/26/03 Does the jurisdiction have a naloxone access law?

Access to Legal Models and Text

The screenshot shows a web interface for legal research. On the left, a vertical list of states is visible: Missouri, Montana, Nebraska, Nevada, North Dakota, Ohio, Oklahoma, and Oregon. The 'THE LAW' section is active, displaying 'New Mexico legal text'. The main content area shows 'N.M. Stat. § 24-23-1 Authority to administer opioid antagonists; release from liability'. Below this, it states: 'A. A person authorized under federal, state or local government regulations, other than a licensed health care professional permitted by law to administer an opioid antagonist, may administer an opioid antagonist to another person if: (1) he, in good faith, believes the other person is experiencing a drug overdose; and (2) he acts with reasonable care in administering the drug to the other person'. A pop-up window titled 'Excerpts from the law:' is overlaid on the left, showing 'N.M. Stat. § 24-23-1, N.M. Stat. § 24-23-2, N.M. Code R. § 7.32.7' and 'N.M. Stat. § 24-23-1, N.M. Stat. § 24-23-2, N.M. Code R. § 7.32.7'.

Information for Action, Accountability, Impetus, Shame

The screenshot shows the CityHealth website interface. On the left, a vertical sidebar contains the "cityhealth" logo and navigation links "FIND A CITY" and "EXPLORE POLICIES". The main content area features the title "Creating the new gold standard for health and well-being in cities" and a paragraph of introductory text. Below the text is a map of the United States with colored dots representing different cities. On the right, a dark grey header contains "ABOUT", "CONTACT", and a search icon. Below the header, two columns of city names are displayed under the headings "WEST" and "SOUTH".

SEARCH BY STATE

Policy surveillance...

- Highlights legal innovations for rapid formative research on implementation
- Documents trends and provides data for first line multi-jurisdictional studies of early adopters
- Creates data for large-scale longitudinal quasi-experimental evaluations of widely adopted measures
- Accelerates identification of effective interventions and necessary refinements

Better Health for All Faster

You Should Know

Dr. Heidi Grunwald and Scott Burris are named inventors on intellectual property (software code and trade secrets) that cover the technology platform (The MonQcle) that was built specifically to build, store and display scientific policy data. They are co-founders and board members of Legal Science, LLC, which has licensed the software technology from Temple University for commercial development.

REFLECTIONS FROM A FUNDER—NIDA

MARSHA LOPEZ

BETHANY DEEDS

RESEARCH PORTFOLIO DEVELOPMENT & POLICY SURVEILLANCE: INTERSECTIONS

- Drive scientific innovation
- Reduce costs (example: automation)
- Culture of sharing and reproducibility
- Increase reliability and validity of data
- We need a baseline; proactive instead of reactive
- Context/attention shifted to different types of drugs and how they are treated legally.

QUESTIONS WE WANTED TO ASK THE GROUP?

- How do we make researchers aware of available tools and resources so they can conduct more and better legal policy research?
- How do we connect legal and policy research to more individual outcome data?
- How do influence research using these tools to get ahead of the curve instead of being behind it?
- How do we form connections between fields that could benefit from law and policy research with experts in your legal policy research?
- **WE NEED TO BUILD A RESEARCH PIPELINE FOR PUBLIC HEALTH.**
Policy Surveillance is an essential component.

SESSION 2

RESEARCH METHODS

Desiderata for Policy Data used by Researchers

Michael Klitzner, Ph.D.

Senior Research Scientist, The CDM Group, Inc.

Series Should be as Long as Feasible, Given Constraints

- ▶ Most APIS Alcohol Policies date back to 1998; a smaller number date back to 2003
- ▶ Cannabis Policies go back to 2012 (when legalization of recreational use began)

Constraints

- ▶ Data may not exist (e.g. in electronic form, or in earlier years)
- ▶ Historical research is expensive (trade-off against number of policies)

Temporal Resolution as Fine as Possible

- ▶ APIS provides a temporal resolution of 1 day

Comparability of Data – “apples to apples”

- ▶ Policy variables must be comparable across all or nearly all jurisdictions to be meaningful
- ▶ Policy variables must be defined as accurately as possible to permit valid conclusions

Caveats and Limitations are Clearly Spelled Out

Explanatory Notes and Limitations Applicable to All APIS Policy Topics

1. State law may permit local jurisdictions to impose requirements in addition to those mandated by State law. Alternatively, State law may prohibit local legislation on this topic, thereby preempting local powers. For more information on the preemption doctrine, see the [About Alcohol Policy](#) page. APIS does not document policies established by local governments.
2. In addition to statutes and regulations, judicial decisions (case law) also may affect alcohol-related policies. APIS does not review case law except to determine whether judicial decisions have invalidated statutes or regulations that would otherwise affect the data presented in the comparison tables.

Caveats and Limitations are Clearly Spelled Out

(continued)

3. APIS reviews published administrative regulations. However, administrative decisions or directives that are not included in a State's published regulatory codes may have an impact on implementation. This possibility has not been addressed by the APIS research.
4. Statutes and regulations cited in tables on this policy topic may have been amended or repealed after the specific date or time period specified by the site user's search criteria.
5. Policy changes in APIS are presented as of the date these changes take effect as law. Users should be aware that in some situations there may be a delay between the effective date of a law and the time a corresponding policy change occurs in practice. Because APIS research is based entirely on primary legal source materials (codified statutes and regulations and, on rare occasions, published court opinions), APIS is unable to accurately determine when policy changes may appear in practice.

Caveats and Limitations are Clearly Spelled Out *(continued)*

6. If a conflict exists between a statute and a regulation addressing the same legal issue, APIS coding relies on the statute.
7. A comprehensive understanding of the data presented in the comparison tables for this policy topic requires examination of the applicable Row Notes and Jurisdiction Notes, which can be accessed from the body of the table via links in the Jurisdiction column.

Extremely Effective QA

- ▶ Researchers need assurance that APIS data are reliable and valid

Room for improvement?

Resource intensive

The unknown

Research Methods: Overdose Reporting and Opioid Prescribing Limits

Héctor Hernández-Delgado
hernandez-delgado@healthlaw.org

January 18, 2018

Non-Fatal Overdose Reporting Requirements

Project Objectives: Review the status of state laws mandating timely reporting of non-fatal overdoses

Research Methods:

- Researched state laws and regulations on disease reporting requirements
- Researched separate state laws and regulations on overdose reporting requirements through Westlaw (using words like “overdose,” “poisoning,” and “report!”)
- Conducted specific searches on state health departments’ websites
- Conducted word-specific searches on legislatures’ websites to verify pending legislation
- Conducted google news searches for new requirements

Opioid Prescribing Limits

Project Objectives: Review the status of state laws limiting the initial dose of opioid prescriptions

Research Methods:

- Researched state laws and regulations on general prescribing limits and more specifically on opioid prescribing limits through Westlaw
- Researched health departments', medical boards', and hospital and medical facilities' websites
- Conducted word-specific searches on legislatures' websites to verify pending legislation
- Conducted google news searches for new limits, including setting up a google news alert for "prescribing limits"

QUALITY CONTROL

State Firearm Laws

building a database of 28+ years of state firearm-related statutes

Molly Pahn, MPH
Boston University School of Public Health

Principal investigator: Michael Siegel, MD, MPH

Support for this project was provided by the Robert Wood Johnson Foundation, Evidence for Action Program. The views expressed here do not necessarily reflect those of the foundation.

The Problem: trends in firearm mortality across the U.S.

List of laws passed by Congress to reduce firearm violence, last ten years

-
-
-

Research question: which state laws are effective in reducing firearm violence?

- Previous existing databases and limitations:
 - Brady Scorecard
 - Law Center to Prevent Gun Violence
 - NRA/ILA

Brady Scorecard:

- Starts in 2007
- Inconsistency in following provisions
- Inconsistent coding
- Limited scope

Law Center to Prevent Gun Violence

- Only current status of laws

NRA

- Only current status of laws
- Limited scope

The Brady Campaign Scorecard

Four Stars indicate that a state has the strongest gun laws to combat gun trafficking, prevent the sale of guns without background checks, and reduce risks to children. California is the only state that qualified in 2011.

Three Stars states have strong gun laws that help combat the illegal gun market, prevent the sale of guns without background checks, and reduce risks to children, but there is still more than can be done to prevent gun deaths.

Two Star states have some common sense gun laws, but the state lacks many policies that would stop guns from being trafficked and protect children

One Star states have weak gun laws that help feed the illegal gun market and allows the sale of guns without background checks and put children at risk.

Zero Stars means that a state has few or no gun laws and the state helps feed the illegal gun market, allows the sale of guns without background checks, and put children at risk.

BRADY STATE SCORECARD

STAR RATINGS

STARS	SCORE
★★★★	75-100
★★★☆☆	50-74
★★★☆☆	25-49
★★☆☆*	11-24
★☆☆**	0-10

The image shows a graphic titled 'BRADY STATE SCORECARD' with a sub-heading 'STAR RATINGS'. It features a table with two columns: 'STARS' and 'SCORE'. The 'STARS' column shows five rows of star ratings: four solid red stars, three solid red stars and one faded star, two solid red stars and two faded stars, one solid red star and three faded stars, and four faded stars. The 'SCORE' column shows the corresponding score ranges: 75-100, 50-74, 25-49, 11-24, and 0-10. The background of the graphic has a faint American flag pattern.

WEDNESDAY, NOVEMBER 12, 2014

STATE CONSTITUTIONAL PROVISION - Article 1, Section 26.

“That the citizens of this State have a right to keep and to bear arms for their common defense; but the Legislature shall have power, by law, to regulate the wearing of arms with a view to prevent crime.”

Gun Laws Overview

	RIFLES & SHOTGUNS	HANDGUNS
Permit to Purchase	No	No
Registration of Firearms	No	No
Licensing of Owners	No	No
Permit to Carry	No	Yes
STATE STATUS		
Castle Doctrine	Enacted	
No-Net Loss	Enacted	
Right to Carry Confidentiality	Provisions Enacted	
Right to Carry in Restaurants	Partial Ban	
Right To Carry Laws	Shall Issue	
Right To Carry Reciprocity and Recognition	Outright Recognition	
Right to Keep & Bear Arms State Constitutional Provisions	With Provisions	

Limitations

All existing databases:

- Provisions not always explicitly defined
- Exemptions
- Scope
- Nuances
- Enforcement
- **Inconsistent coding**

Examples

- Exemptions
 - No firearm possession under age 18
 - Parental consent
 - Hunting, recreation, training
 - Supervised/unsupervised
 - Universal background checks
 - Gun show loophole
 - One per month
 - Concealed carry permittees
- Scope:
 - Background check for ammunition -- dealers v. private sellers
 - Ban for restraining order subjects -- permanent/temporary, dating partners
 - Application of law

- Nuances
 - Record-keeping
 - Name/identifying info
 - Make/model
 - Permit requirements
 - Handgun safety certificate
 - Training
- Enforcement of Provisions
 - No possession if subject to restraining order
 - surrender/relinquishment
 - Confiscation required v. allowed

www.statefirearmlaws.org

- Funding from the Robert Wood Johnson Foundation
- Database of state firearm law provisions
 - 133 law provisions
 - 14 categories of law
 - All 50 states
 - Every year from 1991
 - Up to date

Category Code	Category	Sub-Category	Variable Name	Brief Description of Provision	Detailed Description of Provision
1	Dealer regulations	Licensing	dealer	State dealer license required for sale of all firearms	All firearm dealers are required to have a state license.
1	Dealer regulations	Licensing	dealerh	State dealer license required for sale of handguns	All firearm dealers that sell handguns are required to have a state license.
1	Dealer regulations	Recordkeeping	recordsdealer	Licensed dealers are required to keep and retain records of all firearm sales	Licensed dealers are required to keep and retain records of all firearm sales. These records must include (1) the name and address of the buyer and (2) the make, model, and type of firearm.
1	Dealer regulations	Recordkeeping	recordsdealerh	Licensed dealers are required to keep and retain records of handgun sales	Licensed dealers are required to keep and retain records of handgun sales. These records must include (1) the name and address of the buyer and (2) the make, model, and type of handgun.
1	Dealer regulations	Recordkeeping	recordsall	All private sellers and licensed dealers are required to keep and retain records of all firearm sales	Both private sellers and licensed dealers are required to keep and retain records of all firearm sales. These records must include (1) the name and address of the buyer and (2) the make, model, and type of firearm.
1	Dealer regulations	Recordkeeping	recordsallh	All private sellers and licensed dealers are required to keep and retain records of handgun sales	Both private sellers and licensed dealers are required to keep and retain records of handgun sales. These records must include (1) the name and address of the buyer and (2) the make, model, and type of handgun.
1	Dealer regulations	Reporting	reportdealer	Licensed dealers are required to report all firearm sales records to the state	Licensed dealers are required to report all firearm sales records to the state. Must include gun and sale information and must be transmitted electronically or by mail (not just phoned in).
1	Dealer regulations	Reporting	reportdealerh	Licensed dealers are required to report handgun sales records to the state	Licensed dealers are required to report handgun sales records to the state. Must include gun and sale information and must be transmitted electronically or by mail (not just phoned in).
1	Dealer regulations	Reporting	reportall	All private sellers and licensed dealers are required to report all firearm sales records to the state	All private sellers and licensed dealers are required to report all firearm sales records to the state. Must include gun and sale information and must be transmitted electronically or by mail (not just phoned in).
1	Dealer regulations	Reporting	reportallh	All private sellers and licensed dealers are required to report handgun sales records to the state	All private sellers and licensed dealers are required to report handgun sales records to the state. Must include gun and sale information and must be transmitted electronically or by mail (not just phoned in).
1	Dealer regulations	Reporting	purge	Dealers can retain sales records for at least 60 days after firearm purchase	The law does NOT require that dealers purge their sales records within 60 days of the firearm purchase. This may apply to handgun sales records, long gun sales records, or both.
1	Dealer regulations	Location	residential	Ban on non-commercial dealers	Dealers must have a commercial place of business; they cannot operate out of a home, car, etc.
1	Dealer regulations	Theft reporting	theft	Mandatory reporting of stolen guns by all firearm dealers	Dealers must report any and all thefts of firearms from their businesses.
1	Dealer regulations	Security	security	State requires at least one store security precaution for firearm dealers	At least one of the following is required for gun dealers: (1) No gun displays visible from the outside; (2) Guns must be stored in a specified manner after business hours; (3) Burglar alarms and/or security systems installed.
1	Dealer regulations	Inspections	inspection	Mandatory police inspections of dealers	The law requires at least one annual inspection of gun dealerships by the police or other law enforcement personnel. This refers to a STATE inspection, not an ATF inspection.
1	Dealer regulations	Liability	liability	Dealers are liable for damages resulting from illegal gun sales	Dealers are held liable for damages caused by a gun that they knowingly sold to a person who is either prohibited from purchasing a firearm or who intends to use that firearm illegally.
1	Dealer regulations	Junk guns	junkgun	Ban on junk guns (sometimes called "Saturday night specials")	The law prohibits the sale of handguns that fail to meet one or more of the following requirements: (1) Passes drop testing and firing testing; (2) Passes a meeting point test; (3) Possesses specific handgun safety features; (4) Appears on a list of approved handguns. This may or may not apply to private sellers.

Methods

- To code 100 provisions, we searched each law individually by reading state statutes using *Thomson Reuters Westlaw* & state legislative websites
- Cross-checked our coding with all previously published data.
- Coded an additional 33 provisions from data provided by *Everytown for Gun Safety*.

Coding

- Developed detailed definitions for each provision
- Iterative process
- Trained graduate public health students (two 2.5 hour sessions) on *Westlaw* & historical legislative research
- Each state separately coded by 3 people, cross-checked
- All discrepancies resolved collectively AND further cross-referenced with other research
- Dichotomous coding -- IN PLACE or NOT IN PLACE:
 - 1 = state has passed this provision
 - 0 = there is no legislation in this state for this provision

Dealing with Exemptions, Scope, Nuances, and Enforcement Provisions

- Explicit definitions:

Brief Description of Provision	Detailed Description of Provision	Coding Notes
State dealer license required for sale of all firearms	All firearm dealers are required to have a state license.	State requires all persons engaged in the business of selling firearms to have a license, beyond the required federal license
State dealer license required for sale of handguns	All firearm dealers that sell handguns are required to have a state license.	State requires all persons engaged in the business of selling handguns to have a license, beyond the required federal license
Licensed dealers are required to keep and retain records of all firearm sales	Licensed dealers are required to keep and retain records of all firearm sales. These records must include (1) the name and address of the buyer and (2) the make, model, and type of firearm.	Recordkeeping refers to the recording of sales information that includes, at a minimum, the purchaser's name, contact information or identifying information, and the make and model of the gun. Federal law requires licensed dealers to keep sales records; to be coded as a 1, state must adopt its own recordkeeping requirements or codify the federal law.
Licensed dealers are required to keep and retain records of handgun sales	Licensed dealers are required to keep and retain records of handgun sales. These records must include (1) the name and address of the buyer and (2) the make, model, and type of handgun.	Recordkeeping refers to the recording of sales information that includes, at a minimum, the purchaser's name, contact information or identifying information, and the make and model of the gun. Federal law requires licensed dealers to keep sales records; to be coded as a 1, state must adopt its own recordkeeping requirements or codify the federal law.
All private sellers and licensed dealers are required to keep and retain records of all firearm sales	Both private sellers and licensed dealers are required to keep and retain records of all firearm sales. These records must include (1) the name and address of the buyer and (2) the make, model, and type of firearm.	Recordkeeping refers to the recording of sales information that includes, at a minimum, the purchaser's name, contact information or identifying information, and the make and model of the gun.
All private sellers and licensed dealers are required to keep and retain records of handgun sales	Both private sellers and licensed dealers are required to keep and retain records of handgun sales. These records must include (1) the name and address of the buyer and (2) the make, model, and type of handgun.	Recordkeeping refers to the recording of sales information that includes, at a minimum, the purchaser's name, contact information or identifying information, and the make and model of the gun.
Licensed dealers are required to report all firearm sales records to the state	Licensed dealers are required to report all firearm sales records to the state. Must include gun and sale information and must be transmitted electronically or by mail (not just phoned in).	Reporting of sales records to the state means that the seller must transmit the sales record to state officials in some format (hard copy by mail, electronic, or by phone).
Licensed dealers are required to report handgun sales records to the state	Licensed dealers are required to report handgun sales records to the state. Must include gun and sale information and must be transmitted electronically or by mail (not just phoned in).	Reporting of sales records to the state means that the seller must transmit the sales record to state officials in some format (hard copy by mail, electronic, or by phone).
All private sellers and licensed dealers are required to report all firearm sales records to the state	All private sellers and licensed dealers are required to report all firearm sales records to the state. Must include gun and sale information and must be transmitted electronically or by mail (not just phoned in).	Reporting of sales records to the state means that the seller must transmit the sales record to state officials in some format (hard copy by mail, electronic, or by phone).

- Dividing law into multiple provisions:

- Background checks

- Private v federally licensed sales

- No possession for restraining order subjects

- Permanent v. temporary - separate provisions

Coding Rules

- Every provision is either a 0 or 1
- 1 is always “preventative” - intended primarily to reduce firearm violence, as opposed to loosening of regulations:
 - Expand allowable use of guns
 - Protect industry
 - Prevent local regulation
- Reverse coding - absence of law for three categories:
 - Stand your ground laws
 - Immunity statutes
 - Preemption

A LawAtlas Project

THE POLICY
SURVEILLANCE
PROGRAM

A LawAtlas Project

Recall the Initial Build Process

Currently a
simple random
sample of
state/time
instances?

divergent records /
total records coded

THE POLICY
SURVEILLANCE
PROGRAM

A LawAtlas Project

Why SQC?

- Borrow theory from manufacturing and engineering
 - We randomly sampled a set of records from multiple datasets to calculate the probability that we encountered an error
 - Repeated samples showed that all of our datasets were hovering right around 5% error rate – THUS we use a slightly more conservative probability of error rate for sampling of 10% or .1

How is the SQC process done?

- Once a dataset is completed, a simple random sample is selected from all state / time instances in a dataset. This can be a very large number, some of our longitudinal datasets have more than 11,000,000 records.
- We calculate the needed sample size

$$n = \frac{(Z^2 p*(1-p))}{E^2}$$

Where:

Z = Z value (1.96 for 95% confidence level)
p = probability that we detect an error (.1 used)
E = Margin of Error (.05 = ±5)

How is SQC Process done?

➤ We then use a correction for finite population

$$\text{New } n = \frac{n}{1 + \frac{n-1}{N}}$$

Where:

n = sample size calculation

N = total records in the dataset

Sample Sizes Using our Parameters

Where:

Z = Z value (1.96 for 95% confidence level)

p = probability that we detect an error (.1 used)

		ME = +/- 5%	ME = +/- 3%
N=1000	➔	n = 122	n = 278
N=2000	➔	n = 130	n = 323
N=5000	➔	n = 135	n = 122
N=10000	➔	n = 137	n = 357
N=100000	➔	n = 139	n = 383
N=1000000	➔	n = 139	n = 384

Most Conservative Error Rate

Where:

Z = Z value (1.96 for 95% confidence level)

p = probability that we detect an error (.5 used)

E = Margin of Error (.05 = ± 5)

N=1000	→	n = 278
N=2000	→	n = 323
N=5000	→	n = 357
N=10000	→	n = 370
N=100000	→	n = 383
N=1000000	→	n = 384

The Proverbial Question?

Why don't we report Cohen's kappa like other qualitative researchers?

The Future of SQC

- We want to publish our methods
- We want to explore sample selections above and beyond the simple random sample which is the least efficient estimator
- For example we might start by always selecting parent Qs that have more than 3 child Qs (so proportionate to size)
- Or we might stratify the dataset into states we know have complicated law and those that don't.

NOURISHING: a policy tool

A comprehensive approach to reduce diet-related NCDs

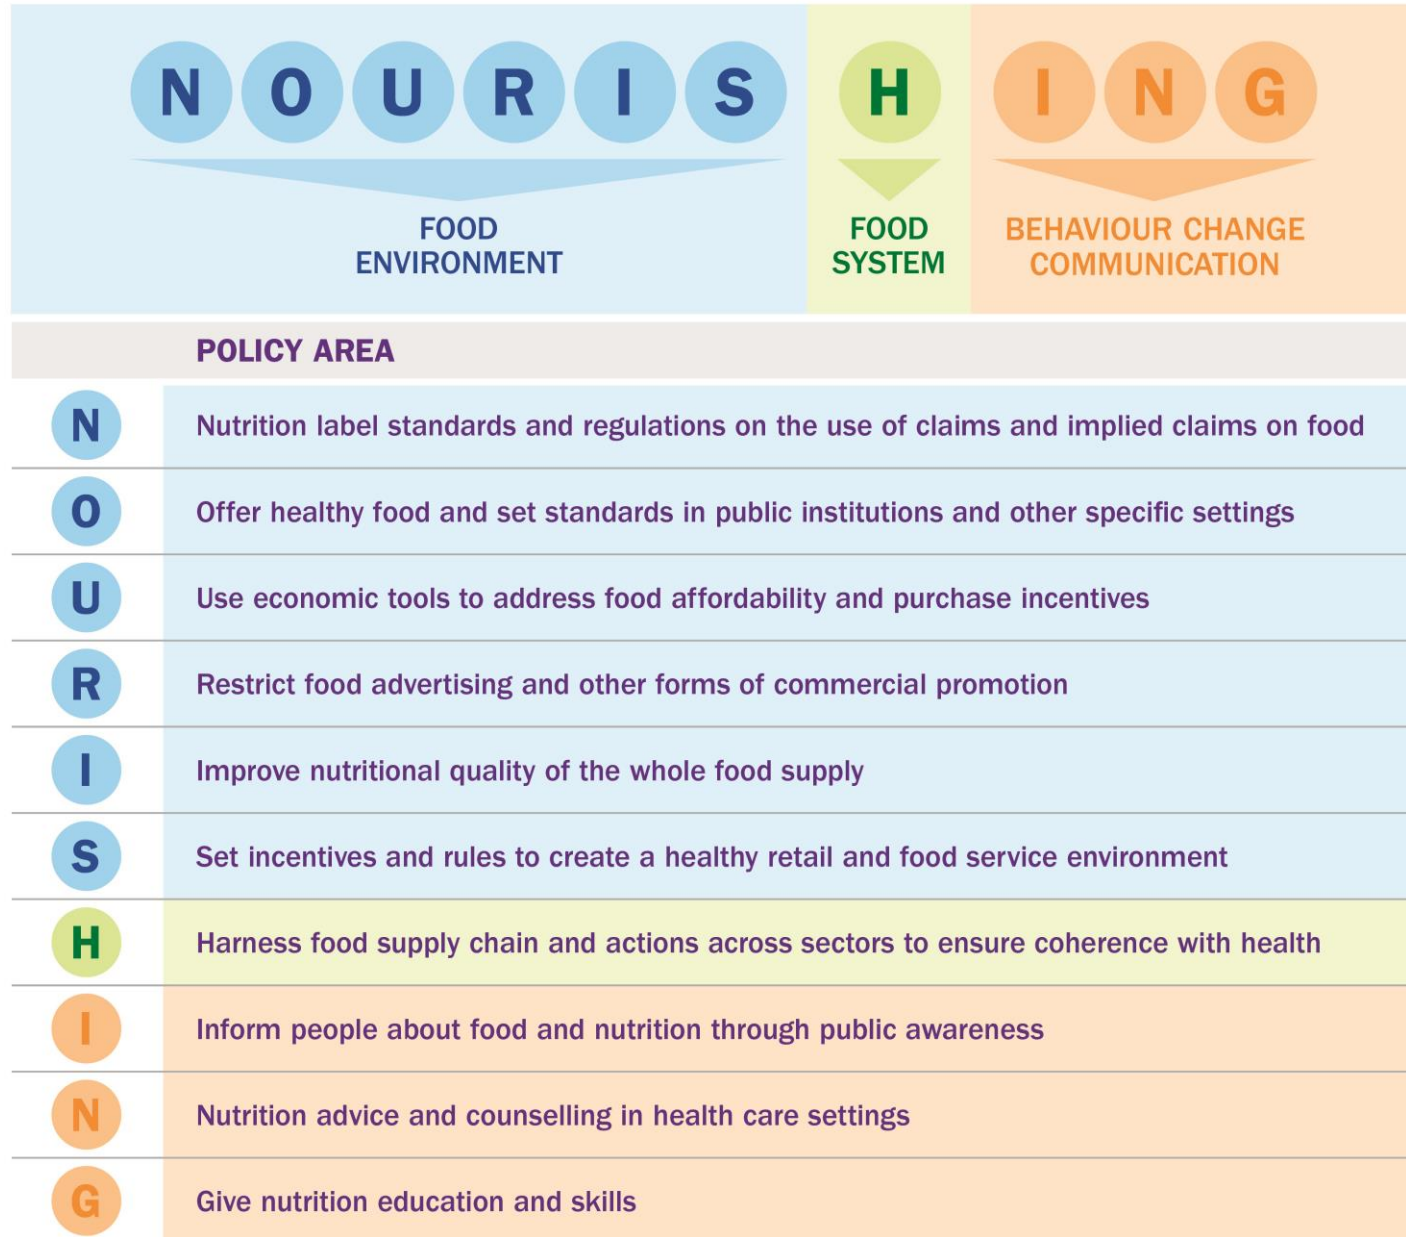

**Policy Surveillance Conference
Philadelphia 18-19 January 2018**

**Bryony Sinclair, MPH
Senior Policy & Public Affairs Manager**

Evidence for policy: The evidence of *effect* from *implemented* policies, for use in subsequent policy development and implementation

1. Where is action needed and what policy options exist?
 - NOURISHING policy framework
2. What policies are implemented?
 - NOURISHING policy database
3. What is the evidence that policies work?
 - Internal reviews of the evidence, publications

How **NOURISHING** can be used

- Policymakers
 - Where is action needed? What will work for us? Is our approach sufficiently comprehensive?

- Civil society organisations
 - What are governments doing around the world? What progress are they making? How can we hold them to account?

- Researchers
 - What evidence is available? What are the research gaps? How can we monitor and evaluate policies?

Filter by country or access the full database below

- Food environment
- Food system
- Behaviour change

- N** Nutrition label standards and regulations on the use of claims and implied claims on foods
- O** Offer healthy foods and set standards in public institutions and other specific settings
- U** Use economic tools to address food affordability and purchase incentives
- R** Restrict food advertising and other forms of commercial promotion
- I** Improve nutritional quality of the whole food supply
- S** Set incentives and rules to create a healthy retail and food service environment
- H** Harness supply chain & actions across sectors to ensure coherence with health
- I** Inform people about food & nutrition through public awareness
- N** Nutrition advice and counselling in health care settings
- G** Give nutrition education and skills

R Restrict food advertising and other forms of commercial promotion

There is clear evidence that the advertisements children see influence their food preferences and habits. There is also a lot of evidence that children and adolescents around the world are exposed to a whole host of other promotional techniques, whether on a billboard or through a phone or computer.

Emerging evidence shows that restrictions work to reduce children's exposure to marketing, but this depends on the criteria used in the restrictions. Given the role played by parents and caregivers in what children eat, consideration is needed of how they are also influenced by promotional activities.

[Download the table](#)

Examples of policy actions

- Mandatory regulation of broadcast food advertising to children
- Mandatory regulation of food advertising on non-broadcast communications channels
- Mandatory regulation of food advertising through any medium
- Mandatory regulation of specific marketing techniques
- Mandatory regulation of marketing of specific food items and beverages
- Mandatory regulation of food marketing in schools

What the action involves and where implemented

In 2012, the Chilean government approved a Law of Nutritional Composition of Food and Advertising (Ley 20.606). In June 2015, the Chilean authority approved the regulatory norms required for the law's implementation (Diario Oficial No 41.193), which came into effect on 27 June 2016. The law restricts advertising directed to children under the age of 14 of food in the "high in" category, including TV programmes, internet, radio and magazines (see above). In addition, the regulatory norms ban the promotion, marketing or advertising of these products in pre-school, primary and secondary schools. (See "N - Nutrition label standards and regulations on the use of claims and implied claims on food" and "O - Offer healthy food and set standards in public institutions and other specific settings" for details of the law's labelling and school food regulations).

CHILE

New evidence-themed series

- Aim: to help policymakers implement evidence-informed nutrition policy
- Policy briefs will:
 - Focus on a specific nutrition policy area
 - Summarise evidence of policy effectiveness – what impact do implemented laws have on behaviours and public health outcomes?
 - Analyse barriers, challenges and enablers to introducing and implementing the specific nutrition policy

Sugar policy brief

- Assessed the effectiveness of implemented consumer-facing policies at influencing the four A's of sugar consumption:
 - Availability
 - Affordability
 - Acceptability
 - Awareness

Updating the database

Two-step process:

1. Sourcing and reviewing policy actions
2. Verification process with in-country specialists

Inclusion criteria for policies

1. Must have a public health goal: reduction of obesity and/or nutrition-related NCDs through promoting healthy diets
2. Must be a government policy action
3. Must be implemented
4. Must fit one of NOURISHING's 10 policy areas

Legal Mapping

- Gateway to technical assistance
- Technical assistance resource
- Menu of policy options – legal approaches
- Comparative analysis of impactful policy

Surveys of State Laws and Fact Sheets

DRUG OVERDOSE PREVENTION
Fact Sheet

Legal Interventions to Increase Access to Naloxone in Colorado

Background

Fatal drug overdose is a nationwide epidemic that claims the lives of an increasing number of Americans every year – over 47,000 in 2014.¹ The majority of these deaths are caused by opioids, both prescription painkillers and heroin. The overdose crisis has not spared Colorado, where nearly 899 people died of drug-related overdoses in 2014, up from 846 in 2013.² The state's rate of drug overdose deaths has climbed 68 percent between 2002 and 2014, from 9.7 per 100,000 residents to 16.3 per 100,000 residents.³ Tragically, most of these deaths are preventable. Opioids kill by depressing respiration, and this opioid-induced respiratory depression can typically be reversed if a generic, relatively inexpensive medication called naloxone is administered in time.⁴

However, access to naloxone and other emergency treatment has historically been limited by laws that make it difficult for those likely to be in a position to reverse an overdose to access the drug and discourage overdose witnesses from calling for help.⁵ State practice laws generally discourage or prohibit the prescription of drugs to a person other than the person to whom they will be administered (a process referred to as third-party prescription) or to a person the physician has not personally examined (a process referred to as prescription via standing order). Additionally, some prescribers are wary of prescribing naloxone because of liability concerns.⁶ Likewise, even where naloxone is available, bystanders to a drug overdose may be afraid to administer it because of liability concerns.⁷ Finally, overdose bystanders sometimes fail to summon medical assistance for fear of being prosecuted for possession of illegal drugs or similar crimes.⁸ To reverse the unprecedented increase in preventable overdose deaths, nearly all states have amended their laws to increase access to emergency care and treatment for overdose victims, including the administration of naloxone.⁹

Increased Access to Naloxone

In 2015, Colorado enacted a law to provide immunity from civil and criminal liability and professional misconduct to physicians, physicians' assistants, advance practice nurses, and pharmacists who prescribe or dispense an opiate antagonist.¹⁰ The law authorizes these medical professionals to prescribe and dispense the medication to the individual

SHOWCASE YOUR WORK.
Present at the
2018 Public Health Law Conference
Health Justice: Empowering Public Health
and Advancing Health Equity
#PHLC2018

Abstract Submission Deadline Extended to December 31!
Don't miss this opportunity to showcase your work and connect with practitioners, policymakers, lawyers, advocates and researchers working on the critical issues that impact the health of our communities.

 **Scott Hall, J.D., Senior Vice President for Civic and Community Initiatives at the Greater Kansas City Chamber of Commerce newest member of the Network's Advisory Board**
In his role at the Kansas City Chamber of Commerce, Scott Hall oversees the work on the Chamber's "Healthy KC" project, an initiative to make Greater Kansas City a destination for healthy living. With his extensive experience in tobacco policy, trauma-informed care and other critical areas, Mr. Hall will help guide the Network's cross-sector and community health initiatives.

 **New HIPAA Guidance Promotes Information-Sharing to Support Recovery from Opioid Addiction**
The Department of Health and Human Services has released new guidelines that clarify when and how healthcare providers can share information with family members, friends and legal representatives of those who are suffering from opioid addiction.

 **Overdose Reporting Requirements**
As powerful synthetic opioids become more available, it is imperative that health departments and other relevant actors are provided with accurate, timely and actionable information on both fatal and non-fatal overdose.

- Bi-weekly
- Current subscribers: 6,349
- Includes:
 - Legal resources and tools
 - Analysis of current issues in law and policy
 - Legal technical assistance highlight
 - Recently published research
 - Network news and events
 - Other news and information of interest

Network Website

The screenshot shows the homepage of The Network for Public Health Law. At the top left is the logo and tagline "Ideas. Experience. Practical answers." To the right is a search bar with the text "Are you looking for something specific?". Below the logo is a navigation menu with links for "Topics & Resources", "Events & Webinars", "Blog", and "About the Network". On the right side of the menu are buttons for "JOIN the Network" and "ASK a Question".

The main content area features a large "Webinar" announcement. The title is "Webinar" in green. Below it, the text reads: "Executive Decision Making and Liability for Public Health Officials", "January 25, 1 - 2:30 p.m. EST", and a "Register" link. The background image shows a group of professionals in a meeting.

Below the webinar announcement are three columns of content:

- What's New:** "Public Health Emergency Declaration Falls Short of Expanding Access to Opioid Use Disorder Treatment in Rural Communities". The text describes the opioid epidemic and mentions the Vietnam War. It includes a "Read More" link and a "Comments" link.
- Latest Resource:** "Issue Brief: Mandatory Drug Stewardship Programs". The text discusses local and municipal governments enacting mandatory local drug take-back programs, also called Extended Producer Responsibility (EPR) or stewardship programs. It includes a "Read More" link.
- Health Justice in 2018:** "A Message from the Network's National Director". The text expresses hope for the year ahead and discusses the Network's mission to address systemic inequities. It includes a "Read More" link and a small portrait of the National Director.

At the bottom of the page is an "Announcements" section.

Executive Decision Making and Liability for Public Health Officials

posted on Wed, Dec 20 2017 10:37 am by Network for Public Health Law

January 25, 1:00 - 2:30 p.m. EST

Co-sponsored by the Network for Public Health Law and the Partnership for Public Health Law*

Public health officials have great discretion in carrying out their responsibilities to protect health. However, this discretion can be legally challenged by individuals, organizations, and government.

By attending this webinar, you'll learn about:

- Discretionary authority public health officials have in carrying out their duties
- Situations where use of discretion may be legally challenged
- Factors the law requires to show proof of an abuse of discretion
- Tools to assist public health decision making (the recent prosecutions of health officials for the Legionella outbreak in Flint, Michigan will serve as an example)

Moderator:

- Jason Coates, Public Health Policy Analyst, American Public Health Association

Speakers:

- Denise Chrysler, Director, Network for Public Health Law - Mid-States Region Office
- Matthew Penn, Director, Public Health Law Program, Centers for Disease Control and Prevention
- Lance Gable, Associate Professor of Law, Wayne State University Law School

Register

You may qualify for CLE credit. ASLME is an approved provider of continuing legal education credits in several states ASLME will also apply for CLE credits in other states upon request.

*The Partnership for Public Health Law is a collaborative of the Association of State and Territorial Health Officials, the American Public Health Association, the National Association of County and City Health Officials, and the National Association of Local Boards of Health.

- Monthly & special series
- Average monthly attendance: 378
- CLE credits available
- Playback available on website and YouTube
- Archived on website

Presentations and Media

- In 2017 Network attorneys:
 - delivered 48 presentations on public health law topics
 - published 27 papers and articles in research and other publications
 - conducted 7 workshops/trainings for a total of 415 participants
- Legal mapping sourced by news media, including:
 - New York Times
 - Washington Post
 - CBS News – 60 Minutes
- Resources disseminated on Network’s social media to:
 - 3,599 Twitter followers
 - 9,834 Facebook followers
 - 2,582 LinkedIn members

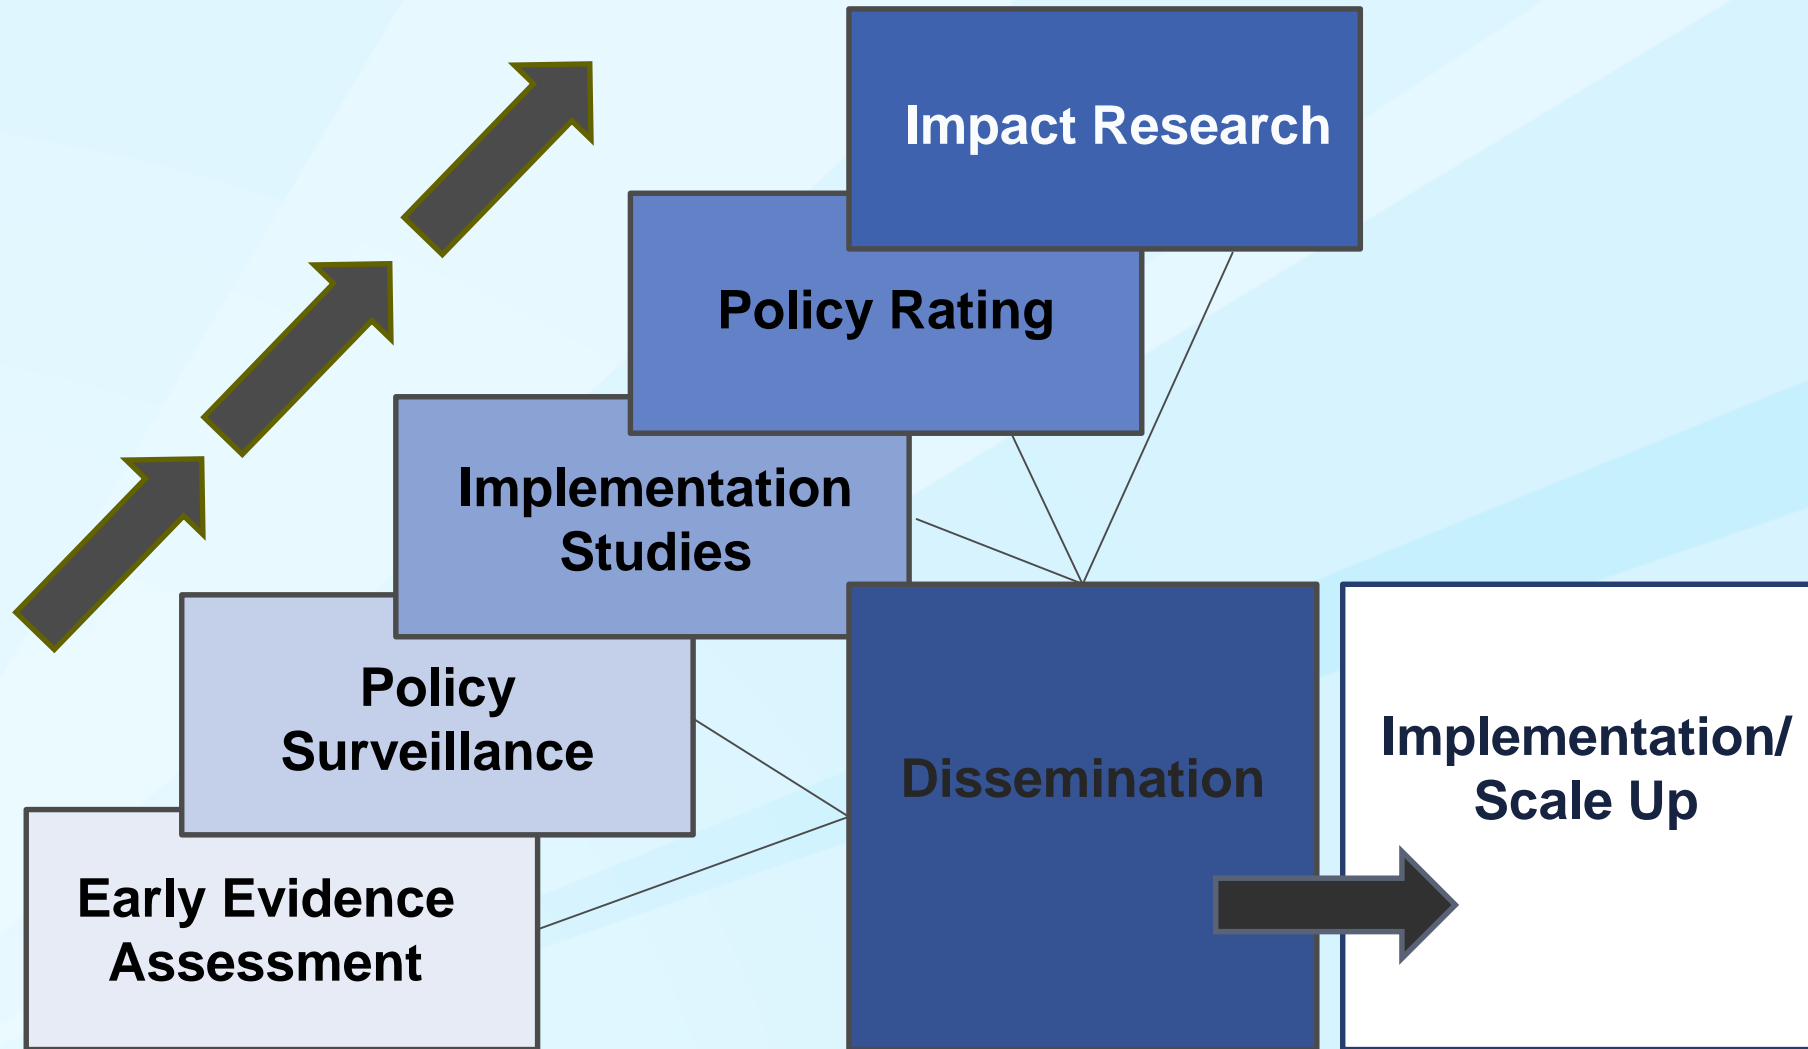

Advancing Knowledge to Practice through the Application of a Policy Research Continuum

Stroke Pre-notification of Receiving Facility by EMS Providers

Evidence Level: BEST

States can encourage EMS providers to pre-notify receiving facilities of a suspected stroke patient; for example, by incorporating pre-notification into EMS protocol algorithms and checklists, including pre-notification as a component of EMS training and continuing education, and reviewing the use of pre-notification as a part of continuous quality improvement activities within stroke systems of care¹¹

Example of state law addressing this policy intervention
 A Wyoming regulation requires EMS providers to issue a "Notification of Stroke Alert" to the receiving Stroke Center as soon as possible for patients with a positive FAST (Facial droop; Arm droop; Slurred speech) and Time to call for help) assessment. 13 Wyo. Code R. 1674 SRS 05 1 through 5 (2017)

Alaska Stat. § 08.64.363. Maximum dosage for opioid prescriptions

7/26/2017 - 10/1/2017 | Version 1 | Managed by: AJFrazer

(a) A licensee may not issue

(1) AJFrazer an initial prescription for an opioid that exceeds a seven-day supply to an adult patient for outpatient use;

(2) a prescription for an opioid that exceeds a seven-day supply to a minor; at the time a licensee writes a prescription for an opioid for a minor, the licensee shall discuss with the parent or guardian of the minor why the prescription is necessary and the risks associated with opioid use.

(b) Notwithstanding (a) of this section, a licensee may issue a prescription for an opioid that exceeds a seven-day supply to an adult or minor patient if, in the professional medical judgment of the licensee, more than a seven-day supply of an opioid is necessary for

The Prescription Drug Abuse Policy System ([PDAPS](#))

The screenshot displays the PDAPS web application interface. At the top, there is a navigation bar with links for Home, About, Contact Us, News, and Resources. The main heading is "Explore Policy" with a sub-link "Explore and filter by policy questions". A date range selector shows "2013" to "2017" with a "10/01/17" date. Below this are tabs for "EXPLORER", "FILTER", and "RESET".

The "FILTER" section contains several criteria:

- Criteria:
 - 1. Are Physicians expressly granted the authority to directly dispense controlled substances to patients? Yes
 - 1.1. Are there restrictions on how large of a supply a physician may dispense? Yes
- 1. Are Physicians expressly granted the authority to directly dispense controlled substances to patients?
 - Yes
 - No
- 1.1. Are there restrictions on how large of a supply a physician may dispense?
 - Yes
 - No
- 1.2. Are there any restrictions on charging for directly dispensed drugs?
 - Yes
 - No

A modal window titled "Excerpts from the law:" is open, showing text from Alaska Stat. § 08.64.363(a)(1) and (c). The text in (a)(1) states: "an initial prescription for an opioid that exceeds a seven-day supply to an adult patient for outpatient use." The text in (c) states: "The board may not impose disciplinary sanctions on a physician for prescribing, dispensing, or administering a prescription drug that is a controlled substance or botulinum toxin if the requirements under (a) of this section and AS 08.64.363 are met and the physician prescribes, dispenses, or administers the controlled substance or botulinum toxin when an appropriate licensed health care provider is present with the patient to assist the physician with examination, diagnosis, and..."

The background shows a map of the United States with state profiles for Alaska, Delaware, and Hawaii. Each state profile includes a date range selector and a question: "Are Physicians expressly granted the authority to directly dispense controlled substances to patients?" with a "Yes" answer and a "1.1. Are there restrictions on how large of a supply a physician may dispense?" question with a "Yes" answer.

NSF Phase I

Machine Assisted Comparative Policy Analysis in Public Health

- Reduce time and effort costs of producing timely policy analysis across 50 states
- Locate relevant policy text using machine learning, natural language processing
- Use feedback to train more accurate topical legal text models

Funded by NSF: # 1746192

Identify **relevant laws** in context of research topics

In relevant statutes, **present candidates for citations** to questions

Is the law: **3360 - Definitions.Repeal Date: 07/05/2021** about **MEDICAL MARIJUANA**

6. "Public place" [2.08]means a public place as defined in regulation by the commissioner.
[8.58]7. (a) "Serious condition" means:
(i) having one of the following >> [32.38]severe debilitating or life-threatening conditions: cancer, positive status for human immunodeficiency virus [16.06]or acquired immune deficiency syndrome, amyotrophic lateral sclerosis, Parkinson's disease, multiple sclerosis, [0]damage to the nervous tissue of the spinal cord with objective neurological [5.94]indication of intractable spasticity, epilepsy, inflammatory bowel disease, neuropathies, Huntington's disease, or [0]as added by the commissioner; and
(ii) any of the following [0]conditions where it is clinically associated with, or a complication of, a [23.11]condition under this paragraph or its treatment: cachexia or wasting syndrome; severe [13.43]or chronic pain; severe nausea, seizures; severe or persistent muscle spasms; or << [0]such conditions as are added by the commissioner.
(b) No later [0]than eighteen months from the effective date of this section, the commissioner [0]shall determine whether to add the following serious conditions: Alzheimer's, muscular dystrophy, [10.87]dystonia, post-traumatic stress disorder and rheumatoid arthritis.
8. "Medical marihuana" means [1.0]marihuana as defined in subdivision twenty-one of section thirty-three hundred two of this article, [8.82]intended for a

Future Development

NIDA Phase II SBIR

Health Outcome Policy Evaluation (HOPE) laboratory

- Expose relationships between drug policy and health outcomes to produce statistical models
- Enable analysts to tune policy variables and understand their effect on outcome projections

Funded by NIH/NIDA: #2R44DA040340-02

Technology with Policy Surveillance Changes the Game

- Legislation and regulation is finite
- Laws measured properly once do not need to be measured again
- Using technology improves policy surveillance
 - Creates efficiencies
 - Reduces costs
 - Improves quality

Ala Code § 34-24-604 Annual registration.
